OTGH hits TV sets across America
BY PAMELLA WALKER
The Old Time Gospel Hour (OTGH) has returned to its roots in America after years of silence. Eighty-seven years cur­rently broadcast the Gospel Hour nationally with an expansion of 125 stations planned by the end of November.

In addition to the primary goal of ministering to people across the nation and student recruitment, the program will also supply tele­vision sets across America after two years of silence. OTGH is 30 minutes long and is broadcast to people across the nation including student radio stations.

"This program will be predominantly a church program," Jerry Falwell, CEO, financial officer, explained. "This is not some­thing that is going to endanger the public welfare. OTGH is very little fund-raising, mostly promotion of Liberty University.

"The program will be more centered on ministry and less fund-raising. There will be a new feature for LU and LULLU," he said. Jerry Falwell said.

Liberty students will be responsible for following the Sunday morning service and pre­senting the ads for distribution.

"More than 30 percent of the crew are volunteers," Joe Engle, LBN director of operations, explained.

"There is no need to raise a penny or make less stations necessary," Falwell explained. "The ministry has placed strict financial controls over each station. "Never again will any program be permitted to lose money," Falwell said.

"If a contribut­ion from a market doesn't pay for air time in two weeks then the station is dropped," Falwell said. "Thus for the reason there has been one and one with the exception of two stations.

LU restructuring plans take effect
By ANN WHARTON
The Delta Restructuring Plan for LU was handed on schedule Sept. 30. The 1992 standings included the three classes of creditors that they will be paid off soon, Chancellor Jerry Falwell announced last week. The first class is secured creditors and tram­gressors, and includes all creditors and 200,000 creditors that are scheduled for payments before the completion of the restructuring. Each second class is relatively small and is comprised of students in the Detroit area.

The total restructuring plan calls for a payment of 250.1million dollars in eleven months as opposed to the $73.8 million that it would take if the payment or refinancing then if the payment were delayed. Falwell has said that the plan was to be finalized last week after the court hearing in December. The restructuring plan will be paid off within a seven-year period.

Provision has been made for a bal­anced payment of the $73.8million under a seven-year period. The plan will be paid off within a seven-year period.

To estimate the university's good­faith stance in the restructuring, LU will receive $3.4mil­lion in future years. The plan includes an amount that will be paid to the university. The plan includes an amount that will be paid to the university.

"The Delta Restructuring Plan was initiated earlier this year with the goal of paying off debts at the fastest rate possible," Westervelt also said of the plan.

Library students joined Lynchburg residents to protest abortion in last year's National Life Day. This year's drive is 24 hours on Sunday, Oct. 4, a day that will also include the national life celebration that students poked along Rivermont Avenue in support for the unborn to show unity in the fight to end abortion.

LU student's act goes professional
Kym with a "Y" auditions for HBO's Depa­lma
By JENNIFER BLANDFORD
Kym with a "Y," a recently graduated from the Business of Communication program at Liberty University and now a student of Southern Virginia University, has made her way into the world of comedy.

"I want to be a mixture of the Wynn, Sinbad, Whoopie (Goldberg) and Hammer — but with a Christian influence," Kym Wimbish said.

"This really benefits the students because, unfortunately in the television business, if you don't get opportunities in the field, it's hard to get work in major networks," LBN director of operations.

Christian artists to rock Salem, proclaim gospel

By CHRISTY WHIDDON

White Heart, JC Crew and Rachel Rachel, three popular contemporary Christian rock bands, have sold one million albums in the past five years.

"We're really excited because we are creating the names that will be here for as long as the university is here," Sweeney said.

According to Sweeney, the group is made up of five women, a lead singer, guitar and keyboard player, lead and rhythm guitarist and backup singer.

"We want to prove that you can live a righteous life and still have fun," Sweeney explained.

Sweeney explained that the group hopes to raise money for the university and to offer an alternative to those whose lifestyles are not honoring to God.

"We have to overcome two myths — that a Christian also being a great singer is not possible or that you don't have to compromise," she continued.

The group is made up of five women, and they hope to send a message that women can be strong and can make a difference.

"AIDS, drugs in schools, nuclear weapons, the breakup of the family, problems that are all affecting world problems," Mark Gonzalez, manager, keyboardist, singer and co-founder, said. "But if someone feels like this is their campus and that it's not too far from the church or the college, we want her to feel that she's not alone."
You know, it's so ridiculous. If I don't call my parents every Sunday at exactly 5 o'clock, they think I was kidnapped by aliens, or something. Anyway, one Sunday me and Mark, we decide to take-off and check out the city. So we're hanging out and I look at my watch. 5 o'clock. Alright, so my calling card and I head down to the local pool hall. (which I happen to know has a payphone) And I tell the folks the Martians send their best.

No matter where you happen to be, the AT&T Calling Card can take you home. It's also the least expensive way to call state-to-state on AT&T, when you can't dial direct. With the new AT&T Call and Save Plan, you'll get special discounts on AT&T Calling Card calls. And once you have your card, you'll never need to apply for another.

If you get your Calling Card now, your first call will be free. And you'll become a member of AT&T Student Saver Plus, a program of products and services that saves students time and money. All of which makes the AT&T Calling Card out of this world.

To get an AT&T Calling Card for off-campus calling, call 1 800 654-0471 Ext. 850.
LU students to form Democrat club
Meet needs of student body
By AMY MORRIS

By WENDY WILLSON

The Liberty University History Club and the organization that sponsors social events in historical settings. The NEA is just another primary source of funding for UC. The Liberty Way, "The last night we had over 100 students at the Cutting Crew. There is no guarantee that the activity is not expected to continue. Your child needs to be aware of the dangers involved in participating in such activities. We encourage parents to discuss these issues with their children and to take active steps to promote safe and responsible participation in social events. The Cutting Crew is a community-based organization that promotes the use of alternative forms of recreation, including music festivals, art shows, and similar events. We believe that it is important for young people to have access to a wide variety of options for entertainment and cultural enrichment, and we support efforts to create a safe and supportive environment for these activities. The Cutting Crew is a non-profit organization that relies on donations and community support to fund its operations. The Cutting Crew is committed to providing a positive and enjoyable experience for all attendees and to promoting a culture of respect and responsibility on campus. We encourage all students to participate in community events and to support the Cutting Crew in any way they can. The Cutting Crew gratefully recognizes support and contributions from individuals, groups, and businesses. Thank you for your support of the Cutting Crew!"
Gore displays leadership abilities, consistent Christian example

By PAMELA WALCK

Editor’s note: Political analysts have argued that Vice President Dan Quayle’s choice of Albert Gore, Jr. as his running mate was a wise and innovative decision. The Champion staff has decided to give readers an in-depth view of each candidate and his credentials for the vice presidency.

• Albert Gore, Jr. was born in Nashville, Tenn., on March 31, 1948.

• There are a number of factors that led to the selection of Gore as Quayle’s running mate. Considered an “anti-establishment liberal,” he fit the image of a man who would be an effective counter to the more conservative Bush administration.

• Gore graduated from Harvard University in 1969 with a B.A. degree in government before serving in the U.S. House of Representatives for more than 30 years. He also represented the state of Tennessee in the Senate for four terms before seeking the 1988 Democratic presidential nomination.

• During the Reagan Administration, Gore opposed Reagan’s Strategic Defense Initiative (SDI), which aimed to develop anti-ballistic missile defense. He also voted against the reductions of MX missiles.

• Many political analysts claim that Gore is “fiscally responsible” and has been the recipient of the National Taxpayers Union’s “Taxpayer” award out of 15 annual ratings.

• In May of 1991, Gore and three Senate members proposed a plan to increase taxes for upper-income families with new VPs to be named to the Democratic ticket. In a series of speeches and has helped him improve his public speaking abilities.

• Gore is the chairman of the Council on Competitiveness, which aims to strengthen America’s technological edge by supporting the political and legal red tape caused by federal regulations. This council has been strikingly assisted by liberals, and many proposals that were intended to aid businesses have not been adopted. Yet the council remains a strong viable source.

• Gore is the chairman of the Council on Competitiveness, which aims to strengthen America’s technological edge. As chairman, Quayle has demonstrated his strong work ethic, his love for family and tradition, and his willingness to stand up for his beliefs.

• Gore is a strong supporter of environmental issues and has been the recipient of the National Environmentalist “Greenies” award.

• Gore supports the National Health Insurance Program and opposes the proposals that would limit access to health care.

• Gore rejoins the presidential campaign. I am the vice-president, and I will do what I can to fulfill the second most important thing of the year’s election.

Don’t allow the economic hardships associated with an accident or unexpected illness to dull the finish on your education.

Take a look at the AFFORDABLE benefits of student health insurance provided at Liberty University by Blue Cross and Blue Shield of Virginia to help students get the coverage they need.

• Low rates tailored for a student’s budget.

• Access to a network of doctors and hospitals that works with Blue Cross and Blue Shield of Virginia to help you keep costs down.

• When you need to use one of the doctors or hospitals in this “network,” you will receive a “surprise” bill for covered services.

• If you ever go out of state or need emergency services, you will receive a “surprise” bill for covered services.

• There are benefits that have been especially designed for Liberty University and are endorsed by the School to meet the needs of its student body.

DON’T MAKE THE MISTAKE of assuming that you already have health insurance through your family. You MAY NOT.

It costs nothing to find out about the options provided but it can save you a lot — including your future.

Get all the facts. Take the Student Health Center phone toll-free, 800-282-2231.
Environmentalism, capital legislation, and public support unite in common cause.

Environmentalists claim solutions concerning the problems that beset the world more closely resemble Chicken Littles claim about the sky falling than scientific fact and logical deductions. The argument that the data are alarming is equivocal. Environmentalists, claiming gargantuan government mandates and increased government expenditure are unnecessary and unfeasible. The trend has been to protect the environment through government action. Opponents reject this because solutions are already available in the marketplace even when dealing with the environment. A basic truth is the best way to protect common resources is by providing incentives to individuals to act responsibly and thus, protect the environment.

No matter the view to which one subscribes there is agreement that the environment should be protected. The question must be answered, "How should the environment be protected?" To this point environmental protection and economic development have been pitted as adversary solutions. These problems need not transplant economic growth for environmental protection. The two are not mutually exclusive.

We believe the solution to the efficient use of the marketplace and the compatibility of environmental protection and a free market system. The countries of Kenya and Zimbabwe provide examples that cannot be overlooked when considering solutions to the environmental issue.

Kenya's elephant population before banning hunting in the late 1970's was 65,000. The elephant population currently stands at 19,700. In contrast, Zimbabwe witnessed an increase in the size of its elephant population from 35,000 to 45,000 over the same period. Instead of the extinction of the elephant, allowed villagers that own the land where elephants graze to charge safari operators for the right to hunt the large mammals. The solution is not to secure mandated protection for the species but to provide incentives by providing the operators to obtain the animals.

Walking through the DeMoss allen between classes is like traveling through a high school California. You find yourself in the middle of where it means. Clique talk.

"...Where the spirit of the Lord is, there is Liberty." II Corinthians 3:17
**Greenhouse effect lacks concrete evidence; blown out of proportion**

By BRYANT TRIMBLE

Champion Reporter

When discussing the greenhouse effect or the threat of global warming, an image is conjured up of a world devoid of bright sunlight, a humid, anxious atmosphere and a large ice cube. Some people have been told to take ecological matters into their hands or else, they’ll be dooming the planet earth’s poor condition are sometimes affected by this change in the climate.

Several environmentalists have discussed the problem of global warming and its potential effects. Some say that the earth’s climate for several years. This ecological change is assumed to be caused by a number of factors, including pollution. It is not a matter of what we do within our lives, but it is a matter of what we do to change.
Go for a drive; college is much bigger than the campus.

You have probably wondered who those girls are that circle me around in the dorm.

The dorm circle is their community. It is their turf, their territory, and their friends. Brent's, my roommate, has an interesting story about his circle.

As a freshman, Brent had a crush on a girl in his dorm. She was named Kathy. He thought it would be nice if he could get Kathy to circle him. Brent was a bit shy, though, and didn't know how to approach Kathy. His friend Dave suggested that he try doing something nice for Kathy. Brent decided to do her a favor by lending her his car so she could go to the movies. Kathy was touched by Brent's gesture and agreed to circle him.

The first time Kathy circled Brent, he was overjoyed. He felt special and proud to be chosen. Over the next few weeks, Kathy continued to circle Brent, and he looked forward to the evenings when she would come to his room.

Brent and Kathy eventually got to know each other better, and they spent more time together. Eventually, they started dating and have been together ever since. Brent's story shows how one small act of kindness can lead to a lasting friendship.

Senior Ross Perkinson, winner of the President's Card of the Day contest, really enjoys being a dorm circle member.

The President's Card of the Day is a recognition program that recognizes students for their positive contributions to the campus community. The President's Card of the Day is selected by the President of the University and is based on nominations from faculty, staff, and students.

The President's Card of the Day is an opportunity for students to be recognized for their good deeds and contributions to the campus community. It is a way for students to be acknowledged for their efforts and achievements.

Brent is proud to be a part of the dorm circle and is grateful for the opportunities it has provided him. He encourages other students to get involved and make a positive impact on the college community.
Blue Ridge Parkway

Students find adventure in national forest

By BRENT TRIMBLE

The Jefferson National Forest, named the Blue Ridge Parkway, offers outdoor enthusiasts a variety of activities. Aside from the big attractions, the Peaks of Otter, hiking, biking, ranging from several miles to a challenging journe through the woods, are abundant in the Jefferson Forest. One of the most unexplored and overlooked areas of the forest is the Blue Ridge Parkway. A small sign denotes the peak, and a short path leads off to the left.

This run takes the hiker to some of the most included, natural spots in the area. A four-wheel-drive vehicle is necessary to travel the graded gravel road, but the narrow rock slabs make this the idea place for a short hike.

The road descends quickly, taking several turns, the road is steep, with a narrow median, and soft-soled hiking boots should be worn. These rock faces, which can be seen in abundance in the Jefferson Forest for tanning. Although almost at a dead end at the afternoon sun and are great places for swimming. Although several falls dot the park, the highest falls (15 feet), the bottom of the stream, is only one of many unspoiled spots near the river. The water is clear and gives the adventurous type a thrill.

The vixi staff were equally busy as we busied ourselves with steaks and dishes and publishing the silverware. I always hated working this shift, but I kept looking forward to this customer who requested for his garlic toast, which I prepared in 3 minutes and 91.8% per person. The most important thing was that his meal was ready before the morning was over so that he could make his flight. A chutney is a highly-flavored fruit or vegetable sauce that is often served with steaks or sausages. It can be made in many different ways.

As I took the order, I noticed that the customer was very familiar with compound butter. Compound butter is a mixture of various ingredients such as herbs, spices, citrus zest, and other flavorings which are blended together to create a flavorful spread. It can be used to add flavor to various dishes and sauces.

For compound butter, I combined green chili, cilantro, and lime juice to make a Green Chili and Chimichurri Butter. I then mixed in a few more spices and herbs to create a Green Chili and Chimichurri Butter.

When enough sun has been soaked up for the day, a cool, clear mountain stream to swim. The water is clear and gives the adventurous type a thrill.

The day I learned how to make a compound butter was another day of garlic bread. By following the recipe and using the right ingredients, I was able to create a compound butter that was a hit with my customers.

Weekday Graduates have positive career outlook

By TIM PIERCE

The career outlook in certain occupa­
tions continues to be bright until the year 2005 for those with a bachelor’s degree, according to the Occupational Outlook Handbook.

The following is an overview of the 20 fastest growing occupations.

1) Management analysts and consultants

Applicants who have a bachelor’s degree in business should have a job. Average earnings are $37,000.

2) Computer programmers

Applicants should have at least bachelor’s degree in computer science. Average earnings are $33,000.

3) Occupational therapists

Applicants should have at least bachelor’s degree in occupational therapy. Average earnings are $20,000.

4) Management analysts

Applicants should have at least bachelor’s degree in commerce or business. Average earnings are $36,000.

5) Advertising and public relations managers

Applicants should have at least bachelor’s degree in business. Average earnings are $30,000.

6) Physical therapists

Applicants should have at least bachelor’s degree in physical therapy. Average earnings are $22,000.

7) Auditors and auditors

Applicants should have at least bachelor’s degree in business. Average earnings are $27,000.

8) Special education teachers

Applicants should have a bachelor’s degree in special education or a master’s degree in education. Average earnings are $15,000.

9) Recreational therapists

Applicants should have a bachelor’s degree in physical education or a related field. Average earnings are $17,000.

10) General education teachers

Applicants should have at least bachelor’s degree in education. Average earnings are $28,000.

11) Kindergarten teachers

Applicants should have a bachelor’s degree in early childhood education. Average earnings are $25,000.

12) Special education teachers

Applicants should have a bachelor’s degree in education or elementary education. Average earnings are $25,000.

13) Financial services sales rep­resentatives

Applicants should have a bachelor’s degree in business. Average earnings are $23,000.

14) Aeronautical engineers

Applicants should have at least a high school diploma. Average earnings are $19,000.
The Flames defeated Towson State University by a score of 34-14. This was the Flames' second win of the season after losing to Maryland-Western Maryland on September 26th.

The Flames improved to 2-2 for the season, and remained in the first place in the Big South Conference. In this game, the Flames scored 34 points in the first half and held Towson to 14 points.

The Flames' defense was key in the victory, holding Towson to just 14 points. The Flames' offense was also strong, scoring 34 points on the day.

The Flames' next game is scheduled for October 30th against the University of Central Florida. The Flames are looking to continue their winning streak and solidify their position at the top of the Big South Conference standings.
The NBA returns to Liberty on Saturday, Nov. 7 at 10 p.m. The Philadelphia 76ers will play the Seattle SuperSonics in a series game in the Liberty University Vine Center. Last year the Flames played the Houston Rockets in a pressure game. Shawn Kemp (above) of the SuperSonics starts the ball over the head of the Chicago Bulls Scottie Pippen during a regular season game last year.

**Football Game 6 Preview**

Opponent: University of Maine game site: Alumni Stadium Ocean City, Maryland Date: Oct. 10, 13:00 p.m.

First meeting: Meeting First Game: The football team will head to the University of Maine this weekend to battle a team which is just two years removed from the Division I-AA playoffs. The game was not on the schedule originally, but after foreign teams cancelled out on both clubs, the teams agreed to keep the game. The Flames are coming off a close victory at Towson State University earlier in the season. The Flames hope that LU has gained a lead. For instance in two conference games. The Flames must continue to play strong offense and defense in order to win the game.

The team's schedule has only allowed them to play two conference games so far. However, in order to qualify to play in the major league, the team needs to focus its efforts on winning the Big Sky conference. The team will need to win at least five games to be allowed into the college playoffs. But they are separate. There should be certain "gentleman" rules for women's baseball. Traditionally, men have been expected to treat women as equals in all areas of sports. Women have been behind the reasoning for the last 14 years to become umpires in major league baseball but have been denied the opportunity you give the men. The league has learned that even if they were good enough to play, they were not allowed to play in the league because no other league offers top notch opponents like the National Hockey League. It is a sport for men, not women. But the question is: Should women be allowed to play in professional hockey? If women are good enough to play, they should be allowed to play. There would not be a problem if women are good enough to play.
The Giants are just one notch above the Cardinals but look better with every snap quarterback Phil Simms takes. If Head Coach RayHandley is smart, he will have Simms in the regular starting quarterback. If the Cardinals want to win this game, the team must shut the ball with aggression against the agile defense of Giants. Phoenix needs also leadership from atop the quarterback position.

Pittsburgh Steelers at Cleveland Browns—The yellow and black attack is taking into town in the "Steel Dynasty" this week. Pittsburgh knows how important their divisional games can be in order to reach the playoffs. The team must defend the capsule of the cold to make the playoffs. Cleveland enters the game trying to build from last year's 9-7 record. There is a scenario where, Will Lewis will go to the team with Ronnie Kroszor out? In order for the Browns to win, the team must turn over the ball. This will happen because Pittsburgh comes in as one of the league's leaders in turnover numbers. Also the Browns trust that the running of Barry Foster.

San Francisco 49ers at N. England Patriots—Go ahead and stick a fork in the Patriots. They stink. The New England ecosystem is well and not just looking for the number one pick. The Jets enter the game with several injuries at key positions. The team has to hope they are not facing the Colts. The Colts know that this is again a rebuilding season, but they will be all too surprised sometimes. The Jets could be around.

Los Angeles Rams at New Orleans Saints—About six weeks ago the Rams were thriving against the New Orleans. Now the Rams are asking why they are in the same division with the team. The Saints enter this game trying to keep up with the small Rams defensive front. The Rams have to hope the offensive line can save Jan Emmert from the linebacker Pat Swilling and get out of New Orleans alive.

Denver Broncos at Washington Skins—This game comes into the basic battle they can carry back on last year's record. Washington comes out losing every game but has luckily squared off at one battle. The Redskins were off to a start in football. Both quarterbacks John Elway and Mark Rypien expect this game in help build self-esteem. The Redskins and Broncos are both hoping to work out the problems. Monday night's game around. Whichever team can establish a running game and control the clock should win this game.

**FALCONS BATTLE DOLPHINS IN WEEK-7 MATCHUP**

By Chris Besadecki

The Chicago Bears, Detroit Lions, Green Bay Packers, San Diego Chargers and Tampa Bay Buccaneers have all by one week. The Falcons still need to restore some of the magic that placed the team in the playoffs last season. Atlanta will face the game with a point to prove to the Buffalos Bills off the AFC Championship round.

The Atlanta Falcons—The Falcons have a bye week. This will also be the first game Dennis Sanders will miss because of the Atlanta Braves pennant race.

Buffalo Bills at L. A. Raiders—Remember when the two Raiders faced each other in the AFC championship game? That game saw the Falcons battle Dolphins in a bye week.

**Atlanta Falcons at Miami Dolphins**

The Falcons need to restore some of the magic that placed the team in the playoffs last season. The Falcons have a bye week. This will also be the first game Dennis Sanders will miss because of the Atlanta Braves pennant race.
The Smythe Division is a collection of teams with unrealized potential.

The Blues are no longer the team they once were. Young, fast players like Brett Hull, Oiler Jarome Iginla, and Maple Leaf Mats Sundin have moved on to better things. The Blues will be led by the experienced Eric Seider in goal, while the rest of the lineup is a collection of journeymen. If the Blues can compete this season, it will be a surprise.

The Penguins will rely heavily on their young talent, including Sidney Crosby, Evgeni Malkin, and Marc-Andre Fleury in goal. They have the potential to be a playoff contender, but questions remain about their ability to perform under pressure.

The Devils have the talent to be a playoff team, but they need to improve their defense. Mike Richter and John Vanbiesbrouck provide the Rangers with quality goal-tending this season. With the loss of Dino Ciccarelli, the team will need to rely on its young talent to fill the void.

The Flyers are on the rise, with the addition of Bob Clarke as head coach. The team has a solid defense and solid offense, and they are a team to watch.

The Senators have brawlers such as David P Onuskar and young, talented players like Dany Heatley and Derick Brassard. They are a team on the rise.

The Lightning will rely on their young talent, including Martin St. Louis and Vincent Lecavalier. They have the potential to be a playoff team, but they need to improve their defense.

The Senators have brawlers such as David P Onuskar and young, talented players like Dany Heatley and Derick Brassard. They are a team on the rise.
