The panel discussion could help undergraduates to read the Word. It may give them a better grasp of how the text means this or that. Given my own fallibility and fin-

"The discussion will underscore the separate disci­plines individually and collectively," Woodard said. One’s interpretation of the Bible will affect how the text is interpreted, Woodard said.

Workers for Coleman-Adams continue work on the new cafetaria. The cafeteria is expected to be ready by Feb. 15 of the spring semester.

Debaters grapple over term limitation

"We must take the focus from rep­resentatives who have interest in po-
citical action committee money to a refocus of the values and issues that concern us all," he said. "We must turn American government back to the concept of representative de-

Eggleston believes the W&L proposal to limit terms "will allow new people to come in and contribute to its enforcement," Patterson explained. Of the many presenters, only one mentioned that the election process and special interests are intertwined in the model presented by the campaign.

All these factors contributed to the council's 1988 decision and continue to contribute to its enforcement, MacCallum explained. Of the many presenters, only one mentioned that the election process and special interests are intertwined in the model presented by the campaign.
**Petty vandalism sweeps across Liberty's campus**

Well, it was bound to happen sooner or later: a commentary student behavior; that is.

An interesting trend seems to be developing among some of LU’s young champions. Maybe it’s because students are eager to engage in the upcoming Christmases break; or maybe they are just so unreceptive they can’t find anything constructive to do. But whatever the reason, a good number of students have seen fit to engage in a wave of petty vandalism.

Across campus the work of these vandals is all too evident. Graffiti, defaced bulletin board, broken lights, and many other examples of senseless destruction remind us at every turn that our school is a campus where who aren’t quite certain as to what constitutes proper behavior.

The point could easily be raised here that our campus witnesses a great deal less vandalism than most state universities. While in theory this is true, it can also be argued that Liberty does not host any of the beer brawl which are usually the main cause of other universities’ destructive behavior. And, for that matter, any amount of vandalism, even if it is less than other schools, should be considered unacceptable on a Christian college campus.

Come on. Are students so completely bored that they find some sort of pleasure in ripping letters off bulletin boards? Or perhaps it’s not boredom, but a desire to destroy certain parts of the university which leads to this board-destruction. If this is the case, then it would be better for everyone if these students can come to see with their own eyes. Then, when the urge to destroy something so wonderful comes, the students have the strength to resist it, all they could, could resist, smear, ruin and eat all day long.

The student groups and clubs which put up these bulletin boards often spend a great deal of time and energy to make them. They use them to let their members know about meetings and special activities. A great deal of planning goes into each one. Then, the next thing some of these students know, the bulletin board is not a mere place to post crumpled letters. And all of that time and effort suddenly goes to waste just to satisfy the childish impulses of a few students.

But the real truth about this whole thing is so simple.

Based upon this axiom, it is probably safe to conclude that if some people decide enjoyment from something as innocent as a piece of paper off the wall or smashing furniture, they are too immature to handle school facilities because they have been vandalized, so let’s help each other by preventing it from happening in the future.

**Dante lacks effort, misses mark in second "Gremlins" release**

There was an article in the Liberty Champion that talked about the new "Gremlins" movie. It mentioned that the movie was not as good as the first one. I believe that the writer of the article was correct.

The movie was not as good as the first one. The story was not as well developed, and the characters were not as interesting. The special effects were also not as good as the first movie.

In conclusion, I believe that the movie was not as good as the first one. The writer of the article was correct.

Cruel tests yield false results

Tuesday, Nov. 27, 1990

In today's society, we have more human pressures and burdens than ever before. One of the many pressures laboratories face today is the need to conduct scientific research on animals.

In a recent study, the Lehigh University Biology Department conducted research on rats and rabbits. The researchers concluded that the animal testing is necessary and ethical.

However, in my opinion, the use of animal testing is not justified. As a biologist, I believe that we should rely on other methods, such as computer modeling and in vitro assays, to conduct scientific research.

Instead of using animals, we could use alternative methods to study the effects of new drugs and chemicals. One such alternative method is the use of human cells in culture.

By using human cells, we can study the effects of drugs and chemicals on human cells without causing harm to any animals.

Moreover, the use of animal testing is not guaranteed to yield accurate results. Animals are not identical to humans in terms of their genetic makeup, metabolism, and physiology.

For example, a drug that is effective in animals might not be effective in humans, and vice versa. This can lead to false conclusions and wasted resources.

In addition, animal testing is often conducted in a cruel and unethical manner. Animals are subjected to pain, stress, and suffering, without any consideration for their welfare.

Therefore, I urge all laboratories to consider alternative methods to animal testing, and to strive for more ethical and scientifically rigorous research practices.

Internships offer opportunity to gain practical experience

By BEN LaFROMBOIS
Campus Features

The LU Internship Office is designed to assist students in applying for and receiving internships. Lew Wodler, director of the LU Internship Office, explained.

"The experience gained through an internship enables the student to use the real world and to solidify future plans. It gives more confidence. I was able to work with people in the profession I want to work in," Nancy Vair, a sociology major who worked with Babcox and Wilcox, said. "The internship allowed me to prove to myself that I could go and do a good job.""An internship also allows students to try the practical application of what they are learning. "The internship gave me more of a sense of what it will be like to be a lawyer," Ed Pana a paralegal major, explained. "The summer internship helped me strengthen my skills."

In addition, an internship can give insight into the positive and negative aspects of a profession. "I saw the harsh reality of divorce and violence," Greg Petroff, a pre-law major who worked in a New Jersey law firm, said. "I wasn't interested in divorce cases when I become a lawyer." The LU Internship Office has contacts in Washington, D.C., as well as others in the profession. Professional sports organizations such as the Boston Celtics and Atlanta Falcons are the newest additions to the organization. The office is available to the internship office. Students have also interned at the White House and CNN, as well as overseas.

"It is helpful to get an internship," Wodler said.

"The process for seeking an internship begins in the Internship Office. LU sponsors that each student has budgeted both administratively and academically before being placed as an intern. The process includes disciplinary records, a financial record and Christian and Community Service form to be filled out before final approval by the faculty advisor." The internship office provides an official acceptance letter which becomes a resume for the appropriate academic advising.

Interests are encouraged to apply a full semester before the desired time of entry. Questions should be addressed to Wodler in RH 151 or extension 5006.

The Lady Flames volleyball team opened its season in the Eastern Collegiate Athletic Conference tournament, held at Southern Methodist University in Dallas, Texas.

The lady Flames swept both the first and second games against the University of Mississippi, 3-0.

"The two seniors (Bream and Thompson) really pulled the team together," said Kelly. "We have a coach who taught me a lot. I wanted to make it happen for the Flames, Thomas, Liberty's other senior co-captain, also played an essential part in the Flames victory by providing 11 kills and 10 assists. "It was great to see both seniors," Kelly said.

"We were 6 for 25," Liberty coach Jeff Meyer said. "I feel like we have better shooters than that." Flames guard Henkel added, "We were 6 for 25. It's not like we have the best game for them."

"It is very important for the student section to wear red," said Tom Caputo, the head of Liberty's student section. "It is important to wear red," said Caputo, "It is important to wear red for the Flames, the team that wins."
