02-15-05 (The Liberty Champion, Volume 22, Issue 13)
Black out

Liberty University was plunged into darkness just before 11 a.m. on Thursday, Feb. 10. A nearby construction crew doing grading work on the railroad track embankment accidentally collapsed a telephone pole which hit machinery and took out two of the pole's foundations.

When the pole tumbled, it caused a chain reaction and bent two other utility poles across the tracks.

"It was very dangerous for a little while (with the lines across the railroad)...." said Lynchburg Battalion chief Keith Johnson in the News & Advance. "The folks from (American Electric Power) believe the rail lines could have been energized for some time."

Students were warned to not cross the railroad tracks because the current running through the rails could electrocute.

The utility pole supplied the main source of power to the University. Liberty had to cancel the remainder of the day's classes. The power came back on around 7:30 p.m. that night.

—From staff reports

Student flies across the country to earn license

She tried to navigate the plane as she saw the left wing dip so low the plane could have flipped over. The wind was terrible that day. The plane bounced so severely that charts and papers were knocked out of her hand and her feet thrown to the floor. Charity Brown could have panicked, but instead she contacted the air traffic controller, telling him that she would be heading back home to Falwell Aviation in Lynchburg.

It would take a few days for Brown to pull herself together before she would try to fly again. She had to wait for the weather to clear.

Her passion for adventure and becoming an avid risk taker led her to want to become a police pilot.

"I could never imagine my life without flying."

Charity Brown

"I have been back and forth a bit as far as what road I want to take in the aviation field, commercial airlines or flying helicopters. I figure that being a police pilot I get the best of both worlds, and it combines my two passions in life, so what better career path to take?" Brown said.

When she first started out, she had to get her private, instrument and commercial ratings.

Her private rating requires three cross-country flights, one of which she was attempting to Mount Airy, N.C., and to Danville Regional Airport when her plane almost flipped.

The downfall of Valentine's Day

Stage 1: cards for everyone, even nerds

Stage 2: Glee club singing telegrams

Stage 3: chocolate companionship

Editor's note: News reporter Aaron Bennett gives a personal account of the LU theater team's experience at the American College Theater Festival (KCACTF) competition. Bennett was nominated for the national Irene Dunn Award for Excellence in Acting.

With the Superbowl now past, and the buzz around that much-hyped event dying, another February night is eagerly capturing the imagination of millions—The Academy Awards. But while you and I rush to see亩the latest blockbuster, those at Liberty University are giving students the chance to do more than sit in a theater and watch someone else's creation. They work hard, not only to hone the art of their craft, but also to make connections within the industry. Liberty University is great because life is completely different between popular or seed. You used to be used to an environment on your pink paper by Althea. Although (which was good) we're used to being encouraged by our mother had no idea how to spoil Althea. Sometimes there were when her and some peer Richardson's name would be left off the list. But now, Liberty would befriend this individual but not good charity. I can't imagine who would have made up for it by allowing him to pass out cupcakes to everyone in the class. Ultimately, there were not enough of those either, and he was better off not being known that cupcakes exist.

Valentine's Day is a beautiful thing to have, but it may not be ideal for everyone. Typically, everyone would be single for Valentine's Day, and no one would complain. While it is true that some people use Valentine's Day to express their feelings, it is clear that not everyone enjoys the day. In fact, many people may feel isolated or left out when they are not able to spend the day with someone special.

In order to compete, nominees were instructed to choose a scene partner, and to prepare a total of six minutes of audition material. My partner was an obvious choice—Andrea Grillo. In fact, I look forward to the day when we can reunite at Liberty's Coffeehouse and perform the same play. Our chemistry was so strong that we were able to bring to life the characters we were playing. We were able to express our feelings for each other in a way that was meaningful to both of us.

Pax 217 is an alternative rock band from Liberty University. Although they have been compared to bands such as Limp Bizkit and P.O.D., Pax 217 seeks to bring a new approach to the genre of rock music. Their music has been compared to the sound of the classic rock era, and they have gained a strong following among fans of the genre.

Pax 217's music is characterized by its powerful guitar riffs and driving beats. Guitarist Adam Bishop and drummer Matt Trent are the two main members of the band, with additional musicians contributing to the sound. Their music has been compared to the sound of classic rock, but with a modern twist that sets them apart from other bands in the genre.

Traffic problems and long routes to the word "train" brings to mind a February 15, 2005, THE LIBERTY CHAMPION, Page A3

For the average Liberty student the word "train" brings to mind a hoary idea of 可能是一个火车，two-hour train journey with no way to avoid the major traumas of traffic and long routes to the train station. But for the Lynchburg community, the train is a symbol of heritage and history, carrying memories of the past on every track.

The Riverside Park, on Rivermont Avenue in downtown Lynchburg, has set aside a way to remember this history. It is a project of the Kiwanis Club of Lynchburg and the Lynchburg City Police Department.

The Kiwanis Club of Lynchburg and the Lynchburg City Police Department have set aside a way to remember the history of the train. The train is a symbol of heritage and history, carrying memories of the past on every track.

The project was released early on Feb. 4 so that students could use it. Evangelism and Christian Life class taught students about the train, as well as other objects, suitable for a history museum. The Kiwanis Club agreed with the idea to build an $8,000,000 train and make it the main attraction in the Central Virginia area.

The train's preservation has certainly drawn the attention of community members to Riverside Park. Another project has been set up for the public in Riverside Park as well.

Memorial: Remembering a hero

Continued from page 1

The memorial service gave a kind of closure to many students at Liberty. For many people who knew Strong, the memorial provided a chance to say goodbye and to celebrate the life of an amazing individual who made an impact.

Those who did not know him were given the chance over the past few weeks to see God’s power and blessings through tragedy.

Many lives were changed because of Strong’s life, and it was amazing to see many lives changed by Strong’s death.

In closing, Falwell, bowing in the Marine Corps motto, said, “I pray we will all leave this place never sin, always faithful.”

Letter to the Editor

Dear Editor,

I am responding to the Commentary removal "Personal responsibility, not government" held on the front page of the Liberty Champion on Feb. 15. This is the worst form of totalitarianism. Americans have the right to make their own choices about how they want to live their lives. The commentary argues that individuals are responsible for their own actions, but it fails to recognize the impact of government policies on people's ability to make those choices. The government should not be the one to judge what is best for individuals, nor should it be their role to force people to make certain choices. Instead, the government should provide a safe and equitable environment for everyone to make their own decisions. This commentary undervalues the power of government and trivializes the impact it has on people's lives.

Sincerely,
[Your Name]

Jennifer Mills

Julia: He’s just not that into you...

I guess I should start by saying that I harbor no animosity or similar toward Valentine’s Day despite the fact that I am single and did not have a holiday this year. I will admit that at times my life has been better without that, but not anymore. The idea for this column came from a recent book titled “He’s Just Not That Into You.” If you have never read the book, I highly recommend it for students at LU, need some advice. It gives tips for how for men should spend $50 on flowers for a woman, but that is a whole other story.

Anyway, here’s my advice for all those girls out there wondering if he is really into you. Firstly, is he really into you? Do you need to text him every day? Or do you have a date with him for Valentine’s Day? If he never asks you out, then he is not into you. A girl who never asks you out is not into you. If he asks you out once, then he is into you.

Hope that helps. Happy Valentine’s Day.

Sincerely,
[Your Name]

Mad science

Laboratory experiments need legal limits

The idea of humans with rodent parents or an ani­mal-human hybrid species coexisting with mankind and animals may seem more like a comic book or futuristic movie plot than life, but the unfortunate truth is that such nightmarish ideas are dangerously close to becoming reality.

On Jan. 25, 2005, the National Geographic News reported on the first chimera in China created by fusing human cells with rabbit eggs. Researchers in Minnesota created pigs with human blood last year and soon an experiment might begin at Stanford University to create mice that have human brains.

Some say, right? I think so. Before such experimentation becomes widespread it is necessary to determine where ethical and legal boundaries should be set to protect human life and dignity. We cannot simply allow all genetic experimentation for good reason.

One reason for not allowing any and all hybrid experimentation is that humans and animals are fundamentally different. In Genesis it says that God created everything, but he specifically made man in his own image. This distinction sets man apart from the rest of creation, which he was commanded to rule over. Humans also have freedom, rights and responsibilities. Governments legislate based on the belief that humans have God-given rights and duties. In fact creating a cross-species creature, or chimera, the term chimera comes from a mythological Greek creature that was part lion, serpent and goat, the article said. Creating chimeric reproductive cells is where the boundary absolutely needs to be set, because disturbing questions arise when new species like this are created.

What does it mean to be human? What rights, if any, should it have? the National Geographic article asked. These are all questions that should be answered by Congress as a reason to prohibit such chimeras from being created. The U.S. needs legislation before this mad science advances any further. Canada has recently passed the Assisted Human Reproduction Act preventing human stem cells from being combined with embryonic animal cells and the U.S. should follow suit.

Many scientists and researchers contemplating or conducting hybrid experimentation have the good of mankind as their goal. The basic premise is that by experimenting with human-animal hybrids spare body parts for transplanting could be developed and many other benefits could arise such as developing new treatments for diseases. But in this case, the ends cannot justify the means nor can people be trusted to hold themselves to ethical standards without legal means. Many things there are in order to prevent unethical wrongdoing. It would be simple enough to prohibit all genetic experimentation combining human and animal cells, but that might be too broad. That definition would already encompass some benefit coming from genetic engineering by bringing such ideas of animal parts in humans, like the common practice of replacing human heart valves with pig heart valves. Most people would not consider that to be unethical, but there are much more troubling waters ahead.

While difficult, it is very possible for scientists to see either human or animal reproductive cells together with other cells to study the interactions and behavior of human cells, but in fact creating a cross-species creature, or chimera. The term chimera comes from a mythological Greek creature that was part lion, serpent and goat, the article said. Creating chimeric reproductive cells is where the boundary absolutely needs to be set, because disturbing questions arise when new species like this are created.

I don't really love or hate Valentine's Day. I am indifferent.

Track and field looks impressive

By Eric Vail

The Liberty Relay Bash lived up to its billing on Saturday as the Flame's men and women's track teams met many new top performance standards at the Tolisma Track Classic. Perhaps the most impressive records were set by both McDougall and Sena Blaha.

McDougall, running in his third indoor meet of the year, gave the fans an incredible performance in the 5,000 meter race. As he outdistanced himself from the other runners, it was clear that he was heading for the win. McDougall finished in a time of 14:32,87, more than a minute in front of his nearest competitor.

**The Bottom Line**

By Patrick Poney

Tough loss: Flames lose at home

Winthrop seemed to get the jump on Liberty when, with about three minutes to play in the first half, Eric Gillen scored and was fouled on the play, giving the Eagles a 47-36 lead. The Flames were without senior guard and team leader Demetres Dunton, who has missed the last five games due to illness. But the Flames were able to come back and pull within three, 52-49, at the half.

"That 11-0 run took the wind out of us," said Dees. "It would be a different story if we had Demetres back in the game, because he is capable of playing and they beat us." But Dees had little reason to lose faith when you know you did not control it. "I do not intend on expecting another outcome, so we will have no plans or expectation and we will just have to see how we do," he said.

"This is obviously a big win, so we were very much looking forward to this," said Dees. "But we are not going to make too much of it. We have to bounce back." The Flames were able to run away with the game with a 15-6 run over the final five minutes of the second half, led by 17 points from Lady Flames senior forward Katie Feenstra.

"Katie Feenstra had 31 points and a career-high 19 rebounds in the victory for Liberty. Daina Staugaitiene also added 14 points and 11 rebounds, while31 points and a career-high 19 rebounds in the victory for Liberty.

**Lady Flames: Keep on rolling**

By Brian Ochter

Winning vs. losing: The new pool in the LaHaye Center will be 25-meters long and up to 12 feet deep.

**Swimming in style**

**Accompanying the new amenities to the installment of Liberty University's new LaHaye Student Center is a new swimming pool area. This 25-meter pool reaches a maximum temperature of 80°F and features a new Vortex
table for meeting the recreational, fitness, and aquatic needs of the student body.**

The mission of the LaHaye Student Center is to provide multiple opportunities for meeting the recreational, fitness, and wellness needs of the student body. The new pool area is open to the public as well, and residents will be able to enjoy the amenities year-round. The new pool will be open during business hours, and visitors are encouraged to check out LibertyFlames.com for more information.

**Swimming pool area is also open for reservations from the student body.**

The LaHaye Student Center also offers a variety of other facilities, including a fitness center, weight room, basketball courts, and locker rooms. These facilities are open to the public as well, and visitors are encouraged to check out LibertyFlames.com for more information.

Liberty’s baseball team will look to improve from last season in which they posted a 25-30 record, and prove that the pre-season predictions that they will finish sixth in the Big South Conference could not be further from the truth.

“Those rankings don’t mean anything,” said third year head coach Matt Royer. “You do not feel like we are going to play until you put the uniform on and start. How anyone starts to look to improve from last year. We have a lot of guys back and a big core of senior pitchers. So I think we can use our pre-season ranking to sneak up on some teams in the Big South.”

“Once from last season is our offensive lineup. Jeremy Roles who led the Big South in hitting, and pitcher James Jones who was a fourth round selection by the New York Yankees.”

“We feel good about this year,” said Royer. “We feel like we are stronger behind the plate. We feel like we are stronger defensively at third base and shortstop. We feel like we have a deeper pitching staff. Our biggest weakness in our one 25-30 season was we walked too many batters. We felt like throughout about 35 of those were unearned. This year we have thrown a lot more strikes, which is something that has to take place.”

The Flames competitive non-conference schedule will help to prepare them for the Big South. The Flames open their season against Old Dominion at home on Feb. 15. Also on the non-conference schedule are Virginia Tech, Marshall, UNC Greensboro, Bucknell, James Madison, Providence, Fairfield, North Carolina A&T, Virginia Commonwealth University and William and Mary.

“Our schedule is going to help us vs we play quality teams out of conference, when we get to the Big conference games against Coastal Carolina, Birmingham Southern and Winthrop,” said Royer. “Our non-conference schedule will really prepare us to go out and play like that.”

“Our schedule will definitely help us early on because we will face a lot of tough pitching,” said senior first baseman Jeff Brown. “Our conference is one of the strongest conferences in the country in the country out of 32 conferences. Our schedule helps from a hitting standpoint. You see a lot better pitching, and guys with a lot better velocity. When we get to come to college you are going to be facing that on pretty much a daily basis.”

The Flames will be looking to a mix of aid and new faces to prove the success of leadership this season.

“As far as freshman Paul Keller, Ryan Paige our new left handers, our new catchers and Adam Kearney will all definitely be an impact,” said Brown. “As far as senior players being up, leading, myself, Phil Laurent shows he has good leadership. Surge Bechtold should probably be our captain.”

“We really expect some leadership from some of our senior pitchers,” said Bechtold.

“I think we can use our pre-season ranking a lot,” said senior Dave Davich. “We did not play as particularly well as we wanted to last year. We have a lot of guys back and a big core of senior pitchers. So I think we can use our pre-season ranking to sneak up on some teams in the Big South.”

“Once from last season is our offensive lineup. Jeremy Roles who led the Big South in hitting, and pitcher James Jones who was a fourth round selection by the New York Yankees.”

“We feel good about this year,” said Royer. “We feel like we are stronger behind the plate. We feel like we are stronger defensively at third base and shortstop. We feel like we have a deeper pitching staff. Our biggest weakness in our one 25-30 season was we walked too many batters. We felt like throughout about 35 of those were unearned. This year we have thrown a lot more strikes, which is something that has to take place.”

“We are definitely going to help us early on because we will face a lot of tough pitching,” said senior first baseman Jeff Brown. “Our conference is one of the strongest conferences in the country and the years to come. The next project on the list of things to do is to put up flag poles and conference poles. Coach Royer hopes to be able to make even larger improvements to the facility in the future.”

“We would like to get lights up here eventually,” Royer said. “I would want around $500,000 to buy the best kind of lights. If you do not want to have to sit on a NCAA regional game, you have to have lights.”

Baseball cleanup: Team projects create unity

Continued from C1

Funds had to be assembled and people, of which have never painted, had to be brought to-gether.

“At first I was skeptical,” Just said. “I was like you’re telling me that five coats of paint on the team are going to buy into this? And then we’re going to have $2,000 to go out together. This idea was talked about by the team, the more the team bought into the concept that it could be good for the team and that it could be accomplished. There was only one problem. Where would the money for these improvements come from? Fairground and paint do not exist on campus and had to be brought together. Jeff Brown and Dave Davich were quick to lend a helping hand. "It was great to see everyone come out," said Just. "We consistently had 80-90 percent of the team working and helping to get the job done."

So what does a few coats of paint mean when it comes to playing baseball? The advantage of this large project made the team in a better position and way more structured than last year. It was a lot less of a physical conditioning and more of a mental conditioning.

“We lost so many batters last year,” said Just. “They were games where we found ways to lose. We have the same talent now as we did last year, we are not going to fold. These are the same guys that worked together to accomplish the point that we didn’t even know how to go about doing. And you’re telling me that we can want to make a difference and make a difference one is? I think that the bond that we developed working together will be able to be larger and that it will carry over into the season.”

The team hopes that the improvements to Worthington Stadium will work in a snowball effect. It will get the players to make subtle modifications to the field they that ended up borrowing the money from the baseball budget.

“We ended up raising $1,250,” said Just. “Money was from parents and from relatives, people who care about the program and a lot from analytics to pay coach back with interest.

Once Just and Laurent found a way to raise the funds and actually bought the supplies, the rest of the team was quick to lend a helping hand. "It was great to see everyone come out," said Just. "We consistently had 80-90 percent of the team working and helping to get the job done."

Hockey wins big

By Michael Troxel
SPORTS REPORTER

Liberty hockey took a road trip last Friday to boaoting for Terps at the University of Maryland. After the exciting last second win against Georgetown in the previous game at the year Station, the Flames were looking for another win. They got what they wanted early as the team went up 3-0 early. Captain Paul MacDonald got the first one. It wouldn't be his last. MacDonald took it upon himself to make a difference and scored four goals in the game, en-route to an 11-5 rout at College Park.

"Right now, our biggest opponent is us. We know that the only way we can lose is if we beat our- selves," Binnie said after the game. Liberty hockey took the tie for a final time this season at home on Friday and Saturday in Roanoke against Virginia Tech. Friday's game is at 7:00 p.m., and Saturday's game is at 5:00 p.m.

The University Hockey League playoffs will be up next for the team at the University of Pittsburgh Feb. 29-72. Following the UHL playoffs is the ECAC Championships. In the 3,000 meters freshman Molly Mountain won in a time of 10:33.34, while teammate Regia Davis finished second, just three seconds behind. The pole vault also saw improved performances. The track site have been removed above the pole vault area and the rest of the hang ceiling will follow. Plans are being made to possibly replace it with large hung TV screens to be used by the convention center and possibly for track events. The new track is conveniently located just beyond the weight room in the Lafayette student center. Unfortunately, due to fire codes, the track will not be open for recreational purposes until most of the racers are able to have installed fire tunnels and emergency exits. After that, the track will be used only by the track team and be open to the public during the many upcoming track meets.

Over 150 athletes were at last writing the official meet. However, this weekend over 300 are expected to show.

If you would like to check out the new track and support our Flames track team, there will be an open event on Feb. 2 at 4:30 p.m.

Kena Butts also gave the opportunity to cheer about as the cleared 15'11" in the pole vault event and qualifying provisionally for the national championships. Her leap also set Liberty and Big South records in the high jump and is the ninth best performance in the country this year for the high jump. Besides Butts, the Lady Flames registered five other event winners for the day. Arlene Zelinskas won the 600 hurdles in a time of 8:8 seconds which qualified her for the ECAC Championships.

YMCA: Offers chance to help with youth sports

The YMCA has the most volunteer opportunities in America. Last fall, two-thirds of the James- son's 88 volunteers were Liberty University Community Service workers.

The service opportunities that the YMCA offers are something much more important than just a required credit. "You get a chance to impact lives of people in the community," White said.

To find out more information about the YMCA's Christian service opportunities and the chance to make a difference in children's lives, contact Chris White at (434) 401-YMCA or email him at chriswhite@lynchburgymca.org.

Camp: Opportunities all over the country

AWANA: Gives children a place to learn

AWANA Cubby or Spark like a little brother or sister. There are a few reasons to choose AWANA over other Christian services. Some education majors prefer it because it gives them practice in a classroom environment. Other students just like being around little people some times too.

If small children and what you had in mind, Hyland Heights has opportunities in the Junior High and high school age groups. AWANA offers a chance to do things you have never done before and don't think you can do anything without total dependence on God. McCord also offers a way of volunteering. "Go Shopping at Goodwill for supplies for the camp, "Be prepared to do things you never done before and don't think you can do anything without total dependence on God."

AWANA is open to all students in the junior high and high school grades as part of a family. Other programs also have a family component. Camp Good News is one of the camps that require all of their campers to work at the front desk, fitness center or food center. Camp Good News has one of the best teen-centered ministry there.

Camp is a great way to get paid for the work you do. "You get to hang out with the band or helping the youth pastor with activities. The students have been known to get their credit, "White said.

**AWANA students have been known to get their CHER credit running awards for the band or helping the youth pastor with activities. The students have been known to get their credit. Most of you had the chance to go to vacation bible school at your church when you were younger. You may remember going to Caravan, YMCA or some other bible camp you most likely hold fond memories of capture the flag, boat rides, hikes and games of man-hunt. If you have ever been to summer camp or have a memory, however fuzzy, of summer days and magical nights swimming in a muddy pond. Churches give Liberty students a chance to experience the fun of church when you were younger. The YMCA's volunteer program offers a wonderful experience and is a possible summer Christian service. Many camps recruiters come to Liberty University through most an overnight camps. A few offer day programs as well.

HELPING THE CHILDREN—Several Liberty football players recently visited the children involved in the AWANA program. Thomas Road and Hyland Heights Baptist churches both offer the program.

AWANA opportunities in local churches

LIFE! REPORTER

There are several things that I find almost impossible to do. Disregarding the obvious, such as maintaining a healthy diet eating at McDonalds or Taco Bell three times a day, creating a schedule, or finding a way to make work as part of your lifestyle. There are two things I've decided that no one can accomplish.

I've had 8 o'clock classes all but one semester. Luckily I've passed all of them. Apparently, I hold the important parts between tests. Anyone who has managed to stay awake the entire semester should be given extra credit points and a day off bed in.

My mother gets up sometime between my bedtime and first stage of my sleep cycle, at 6 a.m. To be fair, I can barely remember my name before that.

I'd like to know who decided that waking before the rooster was the most productive schedule. Of course, by rising I'm able to skip dinner to get in the bed and dinner and don't want to miss a playoff game because I have to get up early to get the worm. I'm not a bird, keep the almanac warm.

My theory is that the same person that came up with the "easy to bad, early to rise" idea also invented Sominex and NoDoz. Now the guy is a millionaire everyday. Smart guy.

So I'm not alone. We've all heard that ringing alarm clock. "No, I don't. What time is it?"

NoDoz. Now the guy is a millionaire everyday. Smart guy.

I'm not a bird, keep the almanac warm. It is possible to find...
