Persecuted Christians

WASHINGTON — In an effort to preserve America's freedom, to make Virginia a land of opportunity and to stop the trend of Americans losing their jobs, Sen. George Allen officially stopped in Lynchburg late last night to formally brief the crowd at Liberty University on his plan to renewed his promise to continue fighting to extend the tax cuts which have been set in place during the Bush administration. He also proposed a taxpayer's bill of rights and expressed support for the Federal Marriage Amendment and its Virginia equivalent.

Allen mentioned his opposition to activist judges who, he said, "legislate from the bench." A host of people, including several Liberty students, were waiting to listen to Allen speak at midnight.

The tour ended in Richmond.

Sen. George Allen stops in Lynchburg

By Jeremy Wicks

On a whirlwind airborne tour of Virginia, Sen. George Allen briefly stopped in Lynchburg last Thursday, April 13, to formally announce his candidacy for re-election to the United States Senate. Accompanied by his wife, Susan, Senator Allen spoke out about his vision for Virginia. His mission had three parts: to secure America's freedom, to make Virginia a land of opportunity and to stop the trend of Americans losing their jobs.

Allen mentioned his opposition to activist judges who, he said, "legislate from the bench." A host of people, including several Liberty students, were waiting to listen to Allen speak at midnight.

The tour ended in Richmond.

Fun in the sun: Summer activities

Getting ready for summer school

By Earl Mitchell

In just a couple weeks, the semester will be over and students will go home to big summer plans. For most, those plans will not involve Liberty, classes, textbooks, lectures or anything else that resembles school. For others, those things cannot be avoided.

Whether a student is behind on his or her degree, or wants to work ahead or is still planning summer activities, there is no substitute for victory. Allen also said that he supports a summer school for current and high school students.

"We can't let our diverse campus go unused," said Kenny Rowlette, the director of summer operations since 2003. The summer programs will include basketball, soccer, baseball, debate, drama and many others. All camps are designed primarily to promote Liberty University and to recruit new students.

"They look at the campus, they experience the campus, and if they like what they see, in addition to their courses there (are) some residual effects," said Rowlette.

The university will act mostly as a housing unit, providing food, meals and facilities to which the camp can run their programs.

Camp out at Liberty University

By Jeremy Wicks

This summer Liberty University will be hosting a variety of camps for current and high school students.

"We have so many diverse camps," said Kenny Rowlette, the director of summer operations since 2003. The summer programs will include basketball, soccer, baseball, debate, drama and many others. All camps are designed primarily to promote Liberty University and to recruit new students.

"They look at the campus, they experience the campus, and if they like what they see, in addition to their courses there (are) some residual effects," said Rowlette.

The university will act mostly as a housing unit, providing food, meals and facilities to which the camp can run their programs.

Midnight 5k run a "success"

By Benjamin Lackey

The Midnight 5k run was a big hit on Saturday when an estimated one hundred and forty liberty students came out for the big race, blowing away last year's previous record of 36 runners.

The event was sponsored by Higher One and organized by the Student Government Association. The event was free to compete, and the first 60 runners to sign up received a free tee shirt.

The first place male and female winners each received a $30 gift card to Riverside Runners. There was also a first place gift card to Wal-Mart given away to the runner with the coolest costume.

First place runner Jason Brown came across the finish line with a time of 16:45 and was followed shortly by second place winner Ryan Peake with a time of 16:52. Brown was sitting in his dorm room at 11:30 p.m. when his roommate came in the door and asked him if he was going to run.

"I just came out here for fun," Brown replied shortly after crossing the finish line. Lauren Reed came in first place for the women with an impressive time of 21:00, and was followed by Stephanie Price with a time of 23:31.

some courses are offered in an online format. This year, there is a lower undergraduate tuition rate. For most courses, the cost is $250 per credit hour.

The Young Champions Camp. The Young Champions Camp is designed to get 11th and 12th graders to prepare for their first week of school. Early Genesis Orientation is a program that allows freshmen and transfer students to take some of the pressure off their first week of school by finishing financial aid and class registration early. "Liberty used to be quiet during the summer, but now it is an exciting place full of action," said Rowlette.

For summer school, the deadline for registration is not over yet, as students still need to register to take summer courses over the summer so they can sign up by contacting the Liberty registrar's office. Students registering now must pay up front.

CampusSERVE - CitiVision

ULSTER PARK, N.Y. — Brett Clubb, Cassy Stephenson, Angelica Alecio and others work on a ditch for a storage unit from Ideal Storage. According to the letter, "We must have the gates open and the doors open for people to come in and go out and talk to people, including pastors," said Vail, "so they're not teaching the kids, or when they go out into the world, they have thought through the issues either."

"If Genesis isn't the truth, where does (Scriptural) truth start?" said Vail. "We send kids to Sunday school and teach them Bible stories, and then we send them off to (public) school to learn about science but we do not teach our kids the Bible as a source of truth. (As a church, we need to) understand (that) we lose one of our most powerful tools (when) we lose the whole thing."

**Persecuted Alumnus**

**Remembering those who suffer for their faith**

Liberty University alumni and India native Samuel Thomas was arrested on March 16, 2006. According to Compass Direct, a Christian organization for the persecuted, Thomas has been charged with committing anti-Hindu activities and has since remained in custody. Radial Hindu groups, because of the Thomas' work among the Dalit people, have targeted Thomas, along with his father, Archeologist M.A. Thomas. The two men and their organization, Emmanuel Mission International, which is affiliated with the U.S.-based Hugoboyger International, have openly lived among the Dalits, a people who comprise the lowest level of the Hindu caste system. The persecution of the Thomas' ought to have awakened the student body at Liberty University and called us to our knees in prayer and on our feet in action.

Inside the safe haven of most Western nations, we have yet to experience persecution at the intense level many of our brothers and sisters across the globe face daily. If we are the body of Christ, then we ought to be gravely disturbed by the brothers and sisters who are undergoing persecution. According to World Evangelical Alliance, there is an estimated 400 million followers of Christ who are being persecuted in over 60 nations. Christians in North Korea, Vietnam, China, India, Sudan, Nigeria, Pakistan and other Islamic nations undergo the severest persecution. Open Doors, an organization which focuses on ministering to countries which are closed to Christianity, reported that the North Korean government's persecution of Christians was the worst in the world for four years running. "New prisoners in the North Korean political prison camps are taught not to consider themselves as human beings. Even children are subject to forced labor," said Rev. Choel Seon to Open Doors. Seon was taken prisoner at the age of 10 due to his grandfather's Christian beliefs. It is often the practice of North Korea to punish three generations for the crime of one individual. The persecution knows no compassion. In China, women, elderly and youth alike are being forced into "re-education labor camps" because they will not renounce their faith in Christ. In several African nations where war is being waged on Christian communities by Islamic regimes, children are being abducted, women are being raped, and villages are being burned. Western Christians often have the mindset that there is nothing that they can do about persecution. Students at Liberty University were encouraged to pray as well as write letters to government officials on behalf of Samuel Thomas and EMI. Prayer is not a small task. If we are to truly love our brothers and sisters who are undergoing persecution, we ought to demonstrate that through an active commitment to praying for them. Website for organizations such as Voice of the Martyrs, International Rescue and Open Doors list prayer requests from the persecuted. James 2:26 says, "Faith without deeds is dead." Writing letters to government officials is a simple and productive action. Its effectiveness was demonstrated through the ordeal of Abdul Rahaman in Afghanistan. Rahaman was sentenced to death because of his refusal to deny Christ and proclaim faith in Allah. Rahaman has been released, largely due to Western nations pressuring the Afghan government.

There is no valid excuse for the disregard of our persecuted brothers and sisters. We need to remember the Thomas' and our own-weather in India, along with others around the world. Scripture admonishes us to "be devoted to one another in brotherly love," and to "Honor one another above yourselves," says Romans 12:10. We do this by showing concern for one another. We are all part of the same body, united under the headship of Christ.

Failed jobs bill leaves French economy without hope

LISTEN UP!
It's your turn to decide

• Financial.com reported that some Christian churches will open their doors to homeless people this Christmas Day Sunday. While most churches are concerned with issues such as abortion and same-sex marriage, some Episcopal and Presbyterian churches are leading a new movement to raise awareness of the already-lapse economy and destruction of any hope for improvement. The result of guaranteed job security and housing was the very mind of unemployment and economic stagnation. President Dominique de Villepin attempted to extract the nation from with the creation of the bill. A television interview in, de Villepin expressed regret that the measure had not been "understood by everyone." I was an example of a strong solution," said the premier. "A better balance between greater flexibility for companies and greater security for workers would allow us to break with unemployment in our country.

French youth made it clear the policy was faux pas to force to keep their jobs? The French workers age 26 or younger and stated that within a week, was able to spend in a week, it was the total amount that I had spent during a month, I realized that it is too easy today to spend money when others are living in poverty. Before Hurricane Katrina, almost a quarter of Americans lived in poverty. Not only does it for granted that there is no point in harboring personal entitlement state, it will never pick itself up as both Great Britain and America have done. The worker population has proven it would rather expend its energy to destroy the nation's economy rather than building it back up from the ashes. With all due respect, those virtues are not worth taking to the streets.

The Lady Liberty softball team went 6-1 last week, splitting a doubleheader against Coastal Carolina for the season sweep. Rocco said that there were "other options" as far as scheduling more I-A games, though he does not doubt as much as he would want to. "Iusports04v" in Yahoo, The Liberty Champion

The Lady Flames softball leads Big South

The Lady Flames softball team went 6-1 last week, splitting a doubleheader against Coastal Carolina for the season sweep.

Last year, Wake Forest finished with a record of 4-7, going 1-7 in conference play. Rocco said that there were "other options" as far as scheduling more I-A teams, and he did not have doubts about how the Flames' squad could perform. He said, however, that he had all of his scheduling decisions on one question: "Will it help us compete in the Big South Conference this year?"

A two-week break ensues for Liberty, following their contest against Wake, giving them plenty of time to prepare for Homewood. The Homewood game will be played on October 14 against William and Mary, who broke Liberty's last year with a disappointing loss the last week of the season to give Liberty a 1-0 lead.

On Tuesday, Liberty faced the Spartans of UNC-Greensboro in a doubleheader. In the first game, junior pitcher Terra Lowe nearly pitched a complete game until a two-out single by UNC-Greensboro's Amy Miller in the top of the seventh inning. The Lady Flames took game one 4-2. In the second game, a two-run home run by Flames jumped out to a 2-0 lead in the bottom of the first inning before the Spartans offense gained momentum that carried them to a 6-4 win.

On Wednesday, the Lady Flames played the Southern Cardinals, another I-A team, who broke the Flames over for a double-header that was added to the schedule earlier this month. "We had some rainouts and delays, and we'll need to make sure they are on time," said Rocco.

"It's definitely wearing on the pitchers. Featherston called Billy Daniels on the balk, which would come along, complete with Thunder and Lightning. We'll need to make sure they are on time," said Rocco.

Knock when to Fold 'Em

COMMENTARY

Megan Joiner

According to Webster, a sport is defined as "any recreational activity, especially a game, competition, etc., requiring bodily exercise." Webster defines a game as "any form of play or amusement... involving competition under rules. A scheme or a plan." According to this definition, it's easy to understand why football, softball, basketball, even cheerleading and NASCAR could be considered a game.

Let's not get too into the whole cheerleading and NASCAR debate. There is too much time enough in the world. What I want to know is, where does poker fall? It may go without saying, but poker is a great game. I don't care if it's five-card draw or five-card stud.

Liberty's final two home games will be against VMI, in Lexington, Virginia. The game will be against VMI, in Lexington, Virginia. The game against VMI was one of Liberty's best defensive games last season, as they finished just a field goal short of the Keydet's, losing them out by the narrowest of margins, 31-30.

Liberty plays a spring game to showcase their talent on Saturday, April 29. Rocco hopes to generate enthusiasm about football at the school, and give Liberty another program to be proud of. He said, "even if you don't like football, when you wear that shirt with the school name on it, there's always that pride that comes with having a good football team."

NASCAR could be considered a game that takes a lot of skill and mental agility, and to be somewhat one of the world's finest is more than just luck. However, Monopoly and Go Fish also require a certain amount of skill, but I don't expect to turn on the TV and find the world's finest in my living room playing their hearts out.

The Liberty lacrosse accident: A mass rally for the Liberty University men’s lacrosse team was making its way through the campus one spring afternoon when it was involved in a horrific accident involving several players, in turn canceling the remainder of the season. Several players are still recovering.

By Matthew Hegarty

On March 24, 2005, the Liberty University men’s lacrosse team was making good time on U.S. Highway 45 near Pritchard, Ala., on their way to a scheduled game.

Then, about 10:30 p.m. Central Time, tragedy struck when a van belonging to the Westfall family had to make a sudden stop to avoid a collision. The second van behind them did not stop. Westfall’s vehicle was thrust into the intersection and collided with a tractor-trailer, throwing several students from the van.

This week, as they remembered the accident 13 months later, several team members were invited to the presence of God throughout the entire ordeal. Jake Redman, one of the players in the second van who helped lift the first van off the trucked players, recalled the supernatural nature of the accident and its influence on the players.

The fact that the team members who were severely injured stayed alive during the incident has had a very positive impact on their spiritual life,” Redman said.

Redman gave a very positive outlook about what the Flames would go on to do.

In the bottom of the ninth inning, the Flames had the bases loaded with Aaron Lombardozzi at the plate and two outs. Grijalva took a sharp ground ball through the middle of the infield with Lombardozzi making it 3-1. "We missed some pitches today," said Royer. "He's a long ball hitter, and that's what Grijalva does. Make you pay for your mistakes."

"Thompson broke the home run as well as another run in the fifth, before he would finally give way in the seventh inning to Ryan Page with the game-tied at five.

Heading into the bottom of the eighth, Coastal Carolina managed to take a 6-5 lead. With one out and the bases empty, Grijalva stepped up to the plate and delivered a one-out double to left field, breaking the game open going 9-5.

In the ninth inning, the Flames, with Swor prevailing after striking out the side in the eighth, faced five runners and allowed four hits to collect the win by a final score of 13-11.

Hersaley was able to score after a wild pitch from Radford reliever Logan Sappelt making it 1-0. "We really played ball in the second inning, pop fly from Low. The Hornets were held scoreless in the top of the first and give Liberty an early 1-0 lead because of a skinny lead walk through the second inning.

Hersaley and Lombardozzi both scored in the second inning on a wild pitch from Radford reliever Logan Sappelt making it 1-0. "I was seeing the ball well but still needed to adjust to the speed of the game," said Hersaley. "I stayed focused in between games and every-thing just clicked. We all just knew what we had to do."

Wetmore’s plan to give the Lady Flames one more chance to work things before conference paid off. On Friday, Liberty swept the Charlotte-Southern Buccaneers in a doubleheader. In the first game, the Lady Flames wanted no time in scoring as Moore was sent home after completing a double to centerfield. In the second game, Moore reached home again, this time on an RBI single by Jeffs to give Liberty a 2-0 lead over Charleston-Southern. The rest of the game was a rout for Liberty with both prevailing after striking out the side in the eighth while allowing just three hits in a complete game.

Next year will mark the first year in Liberty University history that a group of students will gradu­ ate with a Bachelor of Arts in theater. One of the first to graduate will be Liberty Junior Heather Allen. Allen will receive a degree in theater arts with a concentration in theater major (tfeatder fCCen dares to dream 9ig

Allen was cast in the lead role, Timoune, in the fall musical, "Aida." Though she was busy working, she still managed to go out and have fun. The best time was when she realized that she could do it again. It was like, extreme sledding down the speed happy drivers, it may not always be a speed bump that you are running over. It could have been a Freedom. As needed.

Third, if you are a single girl looking for a good guy, check out the JLJC computer help. If you are a guy looking for a good girl, be a good guy and you will have no problems attracting them. Also, hold on the doors for ladies.

Fourth, if you sit down and make a list of what makes back area, you are probably right. The Liberty Way and probably showing more than is the most of the rest of the world. However, I do not think that this is true. There are rules everywhere. That is life. There is even a Facebook group for people who are complai­ ning about Liberty. If you are a single girl looking for a good guy, check out the JLJC computer help. If you are a guy looking for a good girl, be a good guy and you will have no problems attracting them. Also, hold on the doors for ladies.

Don’t let the bed bugs bite,” was the cute phrase that mom used to say before she tucked you into bed. Little did she know she was the cute phrase that I was thinking of as I read this article. In fact, while you are reading this article, you might even be scratching your arm or ear, or wherever as you suddenly feel that tickling sensation when a bug walks on you. Bug experts say that part of the reason for the rising number of bed bug infestations is believed to be one of the reasons for the rising number of bed bug infestations. Other little creatures hitch hike from around the world in suitcases unknowingly to the carrier and make their way at home as a most unwelcome souvenir.

According to NYTimes.com, bed bug infestations have tripled within the past year. New York City councilman Gail Brewer recently had a law passed that made the rules for bed bug infestations. Bed bugs are one of the greatest health pests and worldwide there are reconditioned mattresses. “Bed bugs were once a common house pest and worldwide these are reports of increasing numbers of infestations. Bed bugs are one of the greatest travel pests of the world and readily transported via luggage, clothing, bedding and furniture. As such, they have a worldwide distribution.”

“They can be found everywhere you could think of. I can’t think of one place where I have not seen a bed bug infestation,” wrote Jeff Eisenberg in The Nature Conservancy. “Bed bugs do not live on germs, they do not eat the food that is left in the kitchen. Bed bugs live on you.”

Bed bugs are pests who enjoy midnight snacking on human blood or any warm blood. While humans think that they are the only ones who are in their bed, they could be sharing it with these tiny, nasty little pests. Their bite can cause large wholes or small itchy bumps, but according to scientists, they are not poisonous.

Unfortunately, most people do not know about bed bugs or what they are. “They can be found everywhere you could think of. I can’t think of one place where I have not seen a bed bug infestation.”

“I have never even heard of them. I just don’t know what they are,” said college student, Larry Grama. College students are some of the many who are infected with bed bugs.

Getting rid of bed bugs is not as difficult as it seems. Though some people would suggest putting poison on the bed, Larry Cross, bug guru, disagrees. “You should never try putting pesticides on your sheets or mattress. It is best to contact a professional in get rid of bed bugs,” said Cross, who has an online website devoted to pests. He also said that bed bugs are very rare and will not just disappear with time.

“Control begins with taking the bed completely apart. Start with the frame, and disconnect as many parts as possible so you can clean all the cracks and crevices and spray with an aerosol insecticide. Any of the common aerosols will do,” Cross says.

“If signs of bed bugs persist, it is time to get a professional. Visiting pest control websites such as Orkin or Terminix can help with confirming that bed bugs are present. Pictures and characteristics of the bugs are available and make it much easier when talking to a professional about what is going to be needed. If you are itching, speculate, or have unusual stains or odor in your bed, you may not be alone at night. Investigate and make sure that you are not attacked by bed bugs, because they do bite. Now, sleep tight.”

Dr. Susan C. Jones, Assistant professor of Entomology at Ohio State University, said that bed bug infestations can be identified by tiny blood stains on bed linens, a nasty looking color of red, or if a sweet, musty odor can be detected. Sometimes the bugs will shed their skin in the bed linens as well as lay eggs.

Sanitation measures include frequently vacuuming the mattress and premises, cleaning the bedding in hot water ... after vacuuming, immediately put the vacuum bag into a plastic bag, sealed tightly, and put it in an outside trashcan. Jones recommends.

According to betterhealth.com, characteristics of bed bugs include:

- Complete 1/2 centimeter long
- Flat-oval shaped body
- Six legs
- Light-brown to rust color after meal of blood
- Six square head
- Large antennae
- Large mandibles (mouth parts)
- Large wings
- Known to the carrier and make their way at home as a most unwelcome souvenir.

The Nature Conservancy, bug guru, disagrees. “You should never try putting pesticides on your sheets or mattress. It is best to contact a professional in get rid of bed bugs,” said Cross, who has an online website devoted to pests. He also said that bed bugs are very rare and will not just disappear with time.
