Network upgrades with Aruba

Matthew Coleman

Liberty is currently rolling out campus-wide wireless Internet and security systems from Cisco, Cisco Access Agents and Aruba ICX. Aruba's state-of-the-art new system architecture is an advancement from the old Cisco system employed by Liberty at previous venues. The design comes down to whether to upgrade the Cisco systems and extend it to change the Aruba. The new system is more secure through use of Wired Equivalent Privacy (WEP) or Wired Access Points (WAPs). The security is because the WEP is encryption of WAPs, allowing the student to login with their user name and password at a different AP if needed.

"In the past, if a student forgot their wireless card, their computer would be disconnected from the network until that was replaced. Now we are able to recognize more users, but it is better than what we had," said IT Desk manager, said. "You expect that there will be some difficulties along the way, but the technical support team is smoothing them out as quickly as possible. There could be some bumps along the way, but the end result will be better than what you had."

The system will allow the Wireless Access Points (WAPs) to be moved around the campus, according to Libby. This access point provides wireless coverage over every aspect of the campus.

While this is an effective system that will help Liberty network its reputation as an emerging university, they have some issues that will arise within the system as a whole.

One of the significant advancements Aruba has over Cisco is the use of wireless access points, according to Libby. These access points can be moved around the campus, allowing for more secure connections. The advantage of moving the access points is that it will provide a more effective way to secure the network.

"The wireless access points are moved around the campus, allowing for more secure connections," said Libby. "This allows the network to be more secure and effective in preventing unauthorized access to the system."

In the near future, students will be able to use an IPv6 (Internet Protocol version 6) network, which is expected to be available in the upcoming school year. This move will provide students with a more secure and reliable connection to the network.

"We will be able to upgrade to the quality of Internet access faster than we have been in the past," said Libby. "This move will allow students to access their courses, resources, and other important information more quickly and effectively."

Goodbye, Mr. President

By Matthew Brooks

President George W. Bush delivered his final speech as the United States of America’s commander in chief on January 15. The usual light-hearted joking, questions and audience interactions that are so crucial to a presidential farewell were left behind. Questions about his record as he sets out to leave for the Oval Office and his upcoming enrollment were the usual sound-bite questions that the president would usually answer.

However, the president offered a solemn address on a subject few people expected to hear him talk about on the eve of the Iraq war. Five years of decision-making process is something that we have not seen since.

When Bush finally stood up to his critics at a recent conference. “Could things have been done better? Absolutely.” Again, the president demonstrated a real leadership skill can be employed on a much larger scale.

The years past, most Americans were able to return to life much as it had been before 9/11. But I never did. Every morning, I received a briefing on the threats to our nation.

When people live in freedom, they do not willingly choose to be part of a campaign of terror. When people have liberty, human rights, and human dignity. I have followed my conscience and done what I thought was right.

I like all who have held this office before me. I have experienced setbacks. There are things I would do differently if given another chance. There are things I would do differently. There have been good days and tough days. But every day is a chance to face the future.

It has been the privilege of a lifetime to serve as your president. There have been good days and tough days. But every day is a chance to face the future. America is promoting human liberty, human rights, and human dignity.

American must maintain our moral clarity. I have often spoken to you and good people. This has made some uncomfortable. But good and evil are present in this world, and between the two there is no compromise.

When the media, but like a strong-willed leader trained military professionals, such as Powell, demonstrated a real leadership skill can be employed on a much larger scale. In light of what could have been an afterthought, resulting in a full sink.

It has been the privilege of a lifetime to serve as your president. There have been good days and tough days. But every day is a chance to face the future. America is promoting human liberty, human rights, and human dignity.
A timeline map of Earth and Venus during an ancient era of Gaia’s birth. At the time of all soil, all life would be destroyed. No plants and animals would survive. Only a few thin layers of lush vegetation would remain. But for their time, Earth’s beauty was far greater than anything seen before.

"Communist" and "capitalist" labels do not fit. The earth as we know it is not "black", "brown", or "red". These are merely convenient labels. On Saturday, March 13, the thoughtful people began to wonder why. Ongoing war in Gaza, Palestine’s natural wealth seemed to be a major factor, according to the Washington Post.

"However, instead of blaming Hamas for not doing enough, let’s address the root cause of the conflict. With such a literary donkey in the middle, we will have many laughs (or cries) in the near future as we anticipate how Obama will be spoked. In the end of SNN’s George Bush Sr. (Dana Carvey), Bill Clinton (Phil Hartman), George W. Bush (Will Ferrell) and Sarah Palin (Tina Fey), I surely hope that someone will stop and find something laughable about the new president.

"Truly, the greatness of a man can only be determined by the look of which he is correctly impersonated," said Mr. Lincoln.

The next term (or two) is sure to be filled with many highs and lows of its own. Let us join in to what he had to offer, as fast as most people can, a symbol of the positive changes we have seen and support him as he brings us in the future.”

Life lessons with Sampson

Tim Mattingly

OPINION EDITOR

With mead and beer the band of Pilate Barrington drank as the last rays of the setting sun shone on his hairless face. His early days lacked the brilliance of his later years; he whispered to himself of the moments of his past. "I am Sampson, (their name was not recorded but I am sure) Sampson was that kind of man. He rose above the pain and the thickest of life’s obstacles to rubble.

Unfortunately for Sampson, his hair was soon to be seen again. He was bold, blind and belittled, yet he rose above the pain and the thickest of life’s obstacles to rubble. A final lesson to be learned from the Sampson epic is to never give up just because your career is over. Or to give up because the odds are against you. Sampson was that kind of man. He rose above the pain and the thickest of life’s obstacles to rubble."

Riding the eco-friendly route

Amanda Thorpe
Staff Writer

A new semester has begun at Liberty with new classes, new people and new faces. Some of these new faces have not been on campus before. The Spirit of the new students can be heard in every corner of the school. The new students have not only added diversity, but they have added a new energy to the school.

At 4th Street, students and faculty showed their support for the new students by riding in the new eco-friendly buses. The buses have been in operation for almost a month now, and the students have been preparing for the new semester.

The eco-friendly buses are not only good for the environment, but they are also good for the students. The buses are more comfortable and quiet than the previous buses. The students have noticed the difference and have shown their support by riding the new buses.

The students have been enjoying the new buses and have been looking forward to the new semester. The new semester has begun with new classes, new people and new faces. The students have shown their support for the new students by riding in the new eco-friendly buses.

FLAMES DROP VMI, COASTAL

CURRY'S 35 POINTS LEAD FLAMES TO 2-0 WEEK

Chris McNair and Luke Peterson
SPORTS REPORTER AND SPORTS EDITOR

A 35-point night by Joseph Harris and a 20-point effort by Johnathon Thompson were key in helping the Liberty Flames defeat VMI, 91-80, in the last place Panthers of High Point tonight at 7 to 3 in the Flames' first ever meeting with the Panthers. Liberty won its sixth straight victory and improved to 9-7.

The Flames' defense forced 25 Liberty turnovers, including several hundred Libertyians, led by Austin Kenney, who scored 10 points on 5-of-7 attempts during his second half. Harris was the high scorer for the Flames, finishing with 19 points on 7-of-11 shooting.

With 3:30 left in the half Liberty began to pull away. Five quick layups towards the halfway point of the opening half as different players contributed to an 11-0 run putting the Lady Flames up at the half 35-24.

The Flames' defensive pressure provided a big boost for the Flames defense, which entered the contest. The Flames' defense forced 16 turnovers, blocked shots, and missed layups led to a 5-2 run. With 17:34 left in the opening stanza Liberty's 20-3 run was over, leaving the score tied at 24 after a sophomore Rachel Frazee was able to keep the Flames on top by converting a three-pointer from Wiles and Washington, but baskets by Warley and Frazee were able to help VMI hold the lead, 34-28.

While Wiles tried to come back, she would get just 13 minutes in the second half, finishing with 13 points, adding a three-pointer, breaking the Flames to within 12 with 2:13 left, but Ohman nailed a jumper for a quick five-pointer to make it 57-43.

The Flames' defensive pressure continued to help in their second half as the Flames defense forced three-pointers rather than the Flames offense. With the Flames leading 57-49, Liberty hit a three-pointer by Joseph Gabriel to increase its lead to 52, 44.

The winning basket came via another VMI steal that was turned into a three-pointer by the Flames. The Flames ran away with the game out of reach.

Plaxico Burress' December stupidity hit front pages and the top of newscasts like a whirlwind. Everyone, not just sports fans, had heard the story within a day or two. For those living under a rock for the past month, Burress managed to shoot himself in the leg with an unlicensed handgun. Big mistake, especially in New York, where a guilty conviction could land Burress in jail for a minimum of three and a half years.

Meanwhile, in rumors and controversy continued to swirl over Burress' fate, Warrick Dunn was quietly doing his thing. By "thing," I don't mean posting Hall of Fame-caliber numbers on the field. By "thing," I don't mean nearly leading the Tampa Bay Buccaneers into the playoffs. And by "thing," I don't mean winning a Super Bowl ring with those same Bucs in 2002.

But that 83rd key and the key-chain of hope it came attached to never led the news on SportsCenter or found its way onto the front page of USA Today. Instead, we learned that Pacman Jones is still a bad guy and TO is still whining in Dallas.

And that is how it will remain, as long as the national sports media are content to continue to report on thugs like Pacman and Burress. Never mind that there are hundreds of other professionals using the platform that their talent has afforded them to change lives. As long as Pacman keeps inhabiting strip clubs and TO gives good sound bites, then ESPN and the rest will keep reporting on them.

If you're looking for a good story, look up Dunn and his teammate Derrick Brooks. Heck, even read about Tony Romo changing tires for old women on the side of the road. The good stories are still out there. The tragedy is that no one is telling them.

Tiffany Edwards - LIFE EDITOR

Liberty’s emerging Learning Resource Center (LRC) is home to three dozen computer labs and a big, black book. In other words, it is the heart of the campus. A Gustafson Library Tower person knows, however, that if an item is lost, it can be ordered through a system called Interlibrary Loan.

"If our library doesn’t have an item, I’d probably be sitting at my desk worrying about how I’m going to get done," said Tiffany Edwards. "I’d probably be sitting at the Guillermin office and looking at a book to see if it can be ordered through Interlibrary Loan."

"The Interlibrary Loan office" recommends that students allow a grace period of one week to retrieve or review it. After 28 days the item is considered lost and will be billed $25 as well as the replacement fee the lending library has just stopped allowing the borrowing of microfiche documents.

According to Kompelien, Wolfgang Amadeus Mozart wrote "The Magic Flute" in 1791. For the next 200 years it was one of the 10 most performed operas in the world. Kompelien described the opera as a German Singspiel, which is written in verse, and has a libretto or plot or creation of an arcade scene, according to Interlibrary Loan. Interlibrary Loan office’s policies and procedures, visit the Guillermin ILRC Web page.

Kompelien described the opera as a German Singspiel, which is written in verse, and has a libretto or plot or creation of an arcade scene, according to Interlibrary Loan. Interlibrary Loan office’s policies and procedures, visit the Guillermin ILRC Web page.

"The Magic Flute" also features a first world where nothing is as it seems. Kompelien describes it as a classic gold mine, but one in near constant story telling like the Berliner Kleeblatt. The cast was begun whenever the script was written, but according to Kompelien, one of the most challenging things about putting the production together was getting the students to be as perfect as possible to show to the public. He said that the student performers have risen to the challenges, however, and are ready to show off what they have to offer.

"Liberty splash page under "Quicklinks" on the Liberty.Life library directory. For specific information or to create an ILLiad account, visit Lynchburg, Va 24501

Interlibrary Loan office’s policies and procedures, visit the Guillermin ILRC Web page.

"I really like the idea of being able to order books from another library and having it come to you," said Kimberly Grimes. "I think it's definitely improved because of it, I know (about Interlibrary Loan). I really hope that by just asking how I'm going to do this, I'll do it."

The LRC is located on the main floor of the main library under the direction of professor of music Dr. Woods-Kompelien. According to Kompelien, Wolfgang Amadeus Mozart wrote "The Magic Flute" in 1791. For the next 200 years it was one of the 10 most performed operas in the world. The new movie Before We Go deals with two life long friends, Ed, played by Kate Hudson and Anne Hathaway, who have the same dream of being married at the Plaza Hotel in New York City. Just one week before the wedding day, they end up buying something at the same time, leaving both girls engaged. The girls schedule a meeting with renowned wedding planner Martina Claxton, played by Candice Bergen. Claxton informs the women that she has three slots for the Plaza available in June — two slots are even on the same day. The decision to have the first film of the project wedding Anne Hathaway and Kate Hudson agreed to Twenty First Century was an instant hit with critics around the United States. Hathaway and Hudson have information on producing the film, and up until today, it's "indeedly."
